

Veidekke aims to be an industry leader in the green shift – in reducing greenhouse gas emissions and protecting the environment. To achieve this objective, our attitudes and actions must comply with the following principles:

## ATTITUDES

- Veidekke will support a precautionary approach to environmental challenges, undertake initiatives to promote greater environmental responsibility and encourage the development and diffusion of environmentally-friendly technologies.\*

## ACTIONS

- **Veidekke will operate its business in accordance with the Paris Agreement** and play an active role in the transition to a climate-neutral society.
- **Veidekke will address climate risk systematically**, as both a financial risk and a financial opportunity.
- **We will actively assist customers, suppliers and partners** with their adjustment to a climate-neutral society. Through innovation and cooperation, we seek to find solutions to environmental challenges.
- **We will add value for customers** through our environmental expertise, and will challenge and advise customers to reduce their environmental impact.
- **Veidekke will prevent and control** pollution, safeguard natural diversity, reduce resource consumption (including of water), and play an active role in developing a circular economy.
- **Our management system gives us an overview of our environmental impact** so that we can improve our environmental performance continuously. This is the aim for all our processes and products, throughout our value chain and throughout the life of each asset.
- **The environment is an integral consideration throughout our business**, in our entire chain of production – from project planning to execution – and when purchasing products and materials.
- **We will invest selectively in innovation and solutions** that support the green shift.
- **We are familiar and comply with** laws, rules and our own requirements.
- **We contribute beyond our own business**, in industry organisations, educational institutions, research and development and cooperation with authorities and politicians.

*\*UN Global Compact environmental principles for responsible business practices*
